

Elizaveta is a 16-year-old abandoned child under the care of her grandmother, faces a crucial need for dental care. With a healing cost of 477.15 USD, financial constraints have prevented her from receiving the necessary treatment. Elizaveta's daily life is marred by acute dental issues, an undeserved reality for any child.

The family, residing in Kherson, consists of five unrelated children from an orphanage. The guardian, Elizaveta's grandmother, works as a teacher and officially cares for all five children. Elizaveta urgently requires dental treatment, a service they cannot afford independently.

Diagnosed with acute catarrhal gingivitis and multiple acute deep dental caries, Elizaveta's dental health is at a critical juncture.
